2. Align the grooves in the top Support with the slots in the top of the Legs. Tap the Support into place with a rubber mallet (Figure 3). Be sure to seat it all the way into the slots (Figure 4). If desired, add weight to the legs before final assembly by removing the plugs, located on the top edge of each leg, pour in a small amount of sand, and replace the plugs.

3. Place the Plank on top of the Legs. Align the snap lugs on the top of the Legs loosely into the corresponding holes in the bottom of the Plank (Figure 5). Strike the top of the Plank with a rubber mallet above each of the snap lugs to lock them into place (Figure 6). Repeat this step with the remaining Plank (Figure 7).
