

# #EB100 RISER

## Directions:

**Step 1:** Partially fill riser(s) with approximately 10lbs of sand, fill remainder with water.

**Step 2:** Screw threaded cap onto the end of the riser.

**Note:** *If using two risers- Thread the nylon ties through the top riser only. Bolt the risers together through the two remaining holes in each depression of riser*

**Step 3:** Thread nylon ties through two outer holes in each depression of riser

**Step 4:** Strap riser to bottom of ladder with nylon ties and tighten securely, making sure that ends of straps do not come in contact with pool liner.
