- 8 - #10 x 3/4" self-tapping screws

Tools Needed

- Rubber Mallet
- Cordless Drill
- 1/8" Drill Bit
- #2 Phillips head driver

Safe Installation

⚠ WARNING

To reduce the risk of drowning, electrocution, falls, or other serious injury or death:

Check building codes/permitting - Consult your local Building Department before installation of your step and equipment. Equipment installation must comply with the codes of the authority having jurisdiction and may require permits (e.g., building, plumbing, electrical, zoning, etc.). Be sure that barriers (fences, gates, etc.) restricting spa access meet local codes.

Use for intended purpose only - Not intended for storing hazardous products (e.g., chemicals) - the step is not a secure location.

Check that you have all required parts - Check the contents of the carton with the Parts List for this step. All parts and hardware are required. If any parts are missing **DO NOT attempt to assemble or install the step**. Instead call Toll Free U.S. 800-635-3213 or visit our website at www.conferplastics.com for assistance.

Select an appropriate location - The step must be located on a level solid base and in a location that will be in full view of competent adult supervision when in use.

- Follow all instructions.

- For stable correct assembly and installation all instructions must be followed completely and in the sequence shown.
- Follow the manufacturer's recommendations for the safe use of all hand tools and equipment used during installation.

Cordless drill only. No corded drills near water - Use a cordless drill for assembly and installation. To reduce the risk of electrocution, NEVER use a corded drill in or around a water.

Lift safely - When lifting awkward or heavy loads, have another person help you.

Double check after installation -

- Before using the product, after assembly and installation, go over the instructions and procedures again to make sure nothing has been overlooked.

Flexible Spa Panel Kit

REPLACEMENT SPA SKIRTING

Available in 3 colors:

Model # FSP

Before

After

Panel Layout

STEP ASSEMBLY:

#1: Install 2 self-adhesive pads on each of the sidewalls.

#2: Pre-drill 1/8" pilot holes in the two marked locations at the end of the 5" support.

#3: With a helper, place the 5" support over the two locking tabs on the sidewalls. Tap down with mallet until seated on the locking tabs. Secure the support at both ends using 2 - #10 x 1-1/4" screws.

#4: Place the 7" support over the two locking tabs with the groove facing up. Tap down with a rubber mallet until seated on the locking tabs. **No screws are required.**

#5: To install the bottom tread, place the tapered edge into the groove on the 7" riser. Apply pressure to force the tapered edge into the groove. While holding the tread in place, have your helper tap the front of the tread with the rubber mallet. This will help seat the tread into the groove. Tap down on top of the tread until seated on the locking tabs.

#6: Place hinge (barrel side up) over the mortised area on the 3" support. Attach using 2 - #10 x 3/4" self-tapping screws through the indents on the support. It is not necessary to drill pilot holes. Repeat to attach second hinge.

***NOTE*: HINGES MUST BE INSTALLED BARREL SIDE UP FOR STEP TO CLOSE PROPERLY**

#7: Position the second tread on a flat surface bottom side up. Place the hinges over the mortised area on the treads and attach using 2 - #10 x 3/4" self-tapping screws in each hinge.

#8: Stand the step up on the front edge. While holding, have your helper place the hinged top assembly support over the locking tabs on back of the step. Tap down until seated onto the locking tabs.

#9: Pre-drill 1/8" pilot holes in the two marked locations at the ends of the 3" support. Attach support using 2 - #10 x 1-1/4" self-tapping screws.

#10: Place storage liner into step.

Safe Use

WARNING

To reduce the risk of drowning, falls, paralysis, electrocution, or other serious injury or death:

Use step system properly.

Use for intended purpose only - Not intended for chemical storage.

- **No diving or jumping from steps** - shallow water; risk of paralysis or death.
- **ONE PERSON ON THE LADDER/STAIR AT A TIME.**
- **Illuminate the steps** when using the spa at night.

Weight limit - 300 lbs. maximum - Exceeding maximum weight may cause the step to fail.

Secure the spa when not in use - (for example, with a locked cover or secure gate) - refer to local codes.

Watch children at all times when they are in or around water to help prevent drowning.

BE SURE AND SAFE - The manufacturer **IS NOT** responsible for improper assembly, installation and use.
